# HARROLD'S - REVIEW

October 1, 1944.

Vol. 3, No. 3.

HARROLD'S PANSY GARDENS & GREENHOUSES

P. O. BOX 29 — GRANTS PASS, OREGON.

## OUR FORTY-SECOND YEAR

For the duration we shall issue only this series of folders scattered over the active seasons of the year or when certain stocks are of the most interest. A copy of each edition will be mailed on publication to all customers of record as well as tradesmen requesting them in the past 2 years.

As in the past, it will be our endeavor to offer in each issue the group of stock that is of immediate interest but it should be remembered that most seed items are available throughout the year. For that reason we suggest that you keep a complete file of these folders as by so doing you will have a complete catalogue of our stock at all times. In the event that copies become lost another can always be obtained on request.

In regard to prices, we hope to maintain these as stable as market conditions permit and will try and keep these current in each list. In all cases, of course, the quotation on any group of stock given in the latest published issue will apply - subject to unforeseen market changes, taxes or government regulations which force a change in price. In such case these prices are subject to change without notice according to usual trade practice.

While we have about as many plants as usual this year we will be late by about 2 weeks in starting to ship in large volume. This is due to extremely high temperatures and the lowest humidity ever recorded in this locality, right at the time that our first planting was germinating. Germination was good but we couldn't establish enough of the sprouted seeds to make it practical to allow them to occupy the ground. The plantings made 8 days later are coming along nicely and shipment will be made from these, in rotation, as quickly as possible. We expect that by October 20th. supplies will be adequate and normal. Better get your order booked at once so as to have an early position on the shipping schedules.

The cultural advantages of over 40 years of seed breeding and growing is behind this stock. We have wide acquaintance with Pansies and each year supply over 1500 professional Florists and Nurserymen with HARROLD'S PEDIGREED STRAIN PANSY SEEDS which are bred and grown in our gardens. NO BETTER SEEDS are available than those used in the production of these plants.

We ship plants successfully into every State in proper season. Safe time for shipping is as follows:— West of Denver, Oct. 1st. to April 20th.; West of the Mississippi River and north of Texas, Oct. 10th. to April 10th.; All other States, Oct. 20th. to April 1st. All orders will be booked for shipment within the above schedule with priority based on rotation of arrival. We can not, due to labor supply, undertake shipment on specified dates or book orders for late season delivery. The nature of our climate and equipment permits shipment all winter.

Because of seed and labor shortages prevailing in this trade it is our belief that there will again be a shortage of good Pansy plants next Spring. Several wholesale growers who have produced heavily in the past have curtailed their plantings and in a case or two actually discontinued them. Last season we were sold out before March 1st. We have planted heavily but still think it sound advice to cover ALL your Pansy plant needs THIS FALL. Pansies require NO HEAT and BUT LITTLE PROTECTION anywhere in the United States.

Order Those Pansy Plants NOW! TODAY!!

### NOVELTY AND SPECIALTY VARIETIES

VARIETY	PRICE PER 100	1,000
HARROLD'S PEDIGREED NOVELTIES: Surplus from our breeding work. Many unusual types and colors. ....	\$2.50	\$.....

JUMBO MIXED: A fine giant bedding mixture. ....	1.25	8.00	21.00
OREGON GIANTS: A good general purpose bedder. ....	1.25	8.00	21.00
MAPLE LEAF GIANTS: Short in color range but large. ....	1.25	8.00	21.00

### QUANTITY AND SHIPPING RULES

#### Covering Plants

Any item less than 250 of a variety and/or size will be charged for at the 100 price. The 3,000 price may be applied to quantities of 3,000 or more, providing no item in the order is for less than 1,000 of a kind and/or size. As shipping weight varies with size of plants and moisture of soil at time of digging, it is impossible to quote a delivered price. Field grown plants from seedling fields will range from 12 to 25 pounds per 1,000 with smaller quantities proportionately heavier. Packing is without soil in Sphagnum moss, a method proven suitable by over 30 years use. NO plants in flats.

THIS ITEM CONTINUED ON NEXT PAGE

ALL perishable material travels most safely by Railway Express. We recommend this and will in NO case assume the slightest responsibility for material sent any other way. Unless specifically instructed otherwise shipment will be made that way. It is as cheap or cheaper than Parcel Post as plants travel by second class rate. Postal shipment if desired may be made but order MUST be accompanied by sufficient funds for postage. C. O. D. charges will be added covering any deficiency.

Prompt shipping schedules will be maintained within the limits of available stock, labor and the weather. We expect to maintain good service as usual but PLEASE give us a break by ordering in good time to allow for any slight delay that might be unavoidable. We give every order our best possible attention but will adhere strictly to filling in rotation of arrival. Normal care will be taken to schedule shipments so as to avoid week-end arrival if handled on a prompt schedule in transit. Shipments taking 4 to 6 days will not be started early in the week and those normally delivering in 2 or 3 days will be forwarded accordingly.

## AUTHORIZED PLANT GROWERS

(WHOLESALE)

As has been our custom for many years we have made every effort to have HARROLD'S PEDIGREED STRAIN PANSIES available to tradesmen, not alone from our home gardens at Grants Pass, but also from a group of other reliable growers so situated throughout the country that these varieties could always be conveniently obtained. We give below a list of these growers and if one is near you it is possible that he can supply you to advantage. None of these growers have the complete line of Harrold varieties and so because of this it will be necessary that you contact the selected grower and find out what can be supplied and prices.

As was the case last season, we expect a shortage of this stock again this year and so are again listing two classes of these growers. Those whose name is preceded by a fist thus (☞) are growers who plant largely to supply plants at wholesale to other tradesmen. The others are tradesmen who have planted in some quantity for their own trade but might possibly have a moderate surplus that could be supplied tradesmen in their immediate vicinity. REMEMBER—don't order from these growers out of this list but write them first and find out what they can supply and at what price.

### PANSY SEEDS Continued

are now sold out until 1945 harvest. It is advisable that you obtain all your Pansy seed requirements for sowings to be made up to next June now as there is a question if there will be enough available to meet all demands.

## Harrold's Pedigreed Originations

### NOVELTY AND SPECIALTY VARIETIES

VARIETY	PER 500 seeds (1/2-oz.)

Because of limited quantity available no pound price can be quoted now.					

## Extra Special

### HARDY CARNATION PLANTS

We offer here the finest block of Hardy Carnation plants that it has been our privilege to supply the trade in the many years we have grown this group. These are all year old, grown in fields of sandy loam soil and have a heavy root and fine top. We are now selling these plants to our own retail trade at from \$2.50 to \$4.00 per dozen and a great many have been sold this way. At the prices quoted below at wholesale they should be a profitable sales leader for you too. They are also valuable lined out for cutting next summer as they will give a very heavy flower production during the summer months. About 70% have bloomed and we have rogued out all singles that have developed so they will come very nearly all double flowered.

### CHABAUD'S GIANT DOUBLE—

VARIETY	Price Per 25	100	1000
Flesh Pink: A delicate soft pink.	\$2.25	\$8.00	\$75.00

Superb Mixture: The largest flowers and many colors.	3.00	10.00	90.00
--	------	-------	-------

You may order 300, not less than 100 of a color, at the 1,000 rate.

# Pansy Seeds

### THERE IS STILL TIME TO PLANT

Now and until Thanksgiving is a good time to plant these in the milder climates for winter and early spring flowering. Where winter climate is mild they will bloom throughout the winter and can be brought into flower in 8 to 10 weeks after sowing. It is also a good time to plant in glass covered cold frames to be wintered over under sash for early spring transplanting. This may be done even where winters are quite severe and plants produced in this way make excellent sales stock for April and May sales next year.

In spite of very heavy demands, a light harvest and general shortage of seeds we are still able to offer substantial supplies of the following varieties because of our large plantings. Our June list offered some additional varieties but these

# Specialty

A NEW HARROLD

## Hardy Primroses

After 7 years breeding work with *Primula polyantha* and *veris* and their hybrids, we believe this to be a group of plants which the Florist and Nurseryman will find most valuable. The new strains thrive over a wider range of cultural conditions and are hardy anywhere in the U. S. Modern strains are less exacting as to culture although they do best in a situation which has always proven favorable. An eastern exposure protected from noon and afternoon sun and drying winds; under light tree shade is ideal. Coolness, some shade, ample moisture, good drainage and medium light woodland type of soil gives best results although the plants have a good tolerance. They are ideal rockgarden subjects and once established should not be disturbed over a period of 3 or 4 years. They are as hardy as Pansies and will winter under about the same conditions.

### Culture is Simple

Seeds may be sown at almost any time of the year that they can be procured. They may be planted from June to Oct. out of doors or in coldframes; or in flats indoors from Oct. to late April. or May. New crop seeds usually are ready in July or Aug.

The seedling soil should be light and seeds covered but lightly. A liberal use, about 1/4th. well rotted cow manure is good. We plant by the Purdue method on top of 1/4 inch of sphagnum moss that has been rubbed through a 1/4 inch screen and firmed over top of flat with a block. After firming moss should be about 1/8th. inch thick. Plant on top of moss but do not cover. A pane of glass should be kept over flat until germination is complete. This method avoids damping off and gives maximum germination. Avoid excessive moisture but see that the moss is kept damp at all times. If covering the seeds with soil or other media do not apply more than 1/8th. inch. Keep bed shaded until germination is complete.

As the seedlings become large enough, about 4 to 6 leaves, prick off into flats and keep in a cool, moist and partly shaded situation. As they are large enough shift from flats to permanent bed or individual pots. If into pots, plunge to the rim in soil to maintain low soil temperature and even moisture. Again protect from severe sun until established. When setting into their final bed add humus, leafmold and/or well rotted cow manure to the soil as the established plant likes a deep, moist, rich loamy soil that is well drained. We do not advise the use of commercial chemical fertilizers but cow manure can be used liberally.

Late Winter and Spring sown plants may be set into their permanent bed in Sept., Oct. or later depending on locality and climate. Sowings planted in Summer and Fall are best set into outdoor beds early the following Spring. Plants may also be propagated by dividing old plants in the Fall. These divisions will bloom the following Spring but seedling plants will be a year old when they bloom.

## HARROLD'S Pedigreed GIANTS

This is a new strain of *Polyantha veris* hybrids on which we have worked for more than six years. The plants are compact and of robust growth while the flowers are born well above the foliage on fine long stems. Flowers are large, often as big as a silver dollar in clusters from 4 to 8 inches across. Colors are outstandingly brilliant and varied — including yellows, reds, and purples of real brilliance as well as pinks, blues and bronzes that are rare.

### FRESH SEEDS

#### SEEDS OF PRIMULA HARROLD'S Pedigreed GIANTS

Price Per Trade Packet — about 200 seeds, \$1.00; 3 pkts for \$2.50  
1/8 oz. about 1500 seeds, \$5.00; 1/8 oz. \$9.50; 1/4 oz. \$18.00.

FRESH SEEDS OF HIGH GERMINATION — SUPPLY LIMITED

### PLANTS

#### ONE YEAR OLD — Transplanted outdoors last Spring

25 FOR \$4.50 — 50 FOR \$7.50 — 100 OR MORE 12c EACH  
250 OR MORE AT 10c EACH

#### SEEDLINGS — Ready beginning in November.

\$5.00 PER 100 — \$42.50 PER 1,000

#### TRANSPLANTS — Ready after January First.

50 FOR \$4.00 — 100 FOR \$7.50 — \$60.00 PER 1,000

## OTHER HARDY PRIMROSES

VARIETY	Price Per Tr. Pkt.	1/16 oz.	1/8 oz.	1/4 oz.

## Southern Oregon Grown GLADIOLUS BULBS

### BOOK YOUR REQUIREMENTS EARLY

Gladiolus will be substantially short again this year as they were last and we can't too strongly stress the necessity of covering your requirements early. AT ONCE IF POSSIBLE. Stock offered here will be ready for shipment any time after December First.

Gladiolus bulbs from the Rogue River Valley here in Southern Oregon have made a most favorable record during the past 20 years and the stock we offer here is the cream of the crop. Varieties are carefully selected and the bulb quality is unsurpassed. As always they are carefully grown and cured and every bulb has been fumigated under the supervision of the Oregon State Department of Agriculture by the most approved fumigant for thrips. These bulbs are clean when sent out.

VARIETY	COLOR	Price Per 100	No. 1	No. 2	No. 3	No. 4

CUT FLOWER BLEND: A selection of cutting types.		4.00	3.50	3.00	2.80	

Because of the limited supply this year it is more necessary than ever to stress that this offer is subject to prior sale. Also it is most advisable, where possible to mention a second choice on each variety or to make several second choice selections that may be used if any items in your order can not be supplied. As in the past, unless requested not to do so, we will substitute the nearest available size in variety ordered (if available) to the same value if sold out of size ordered.

TERMS on bulbs are for delivery f. o. b. the office of the transport agency at Grants Pass, Ore., on a basis of cash with order.

A DISCOUNT OF 5% MAY BE TAKEN ON ITEMS OF 250 OR MORE OF A VARIETY & SIZE — NOT LESS THAN 25 OF A SIZE & KIND SOLD.

## SNAPDRAGON PLANTS FORCING VARIETIES

Greenhouse bench grown these plants are 4 to 6 inches high and have a good sturdy growth. They are large enough to bench direct or plant outdoors in localities where the weather permits outdoor plantings in winter. You will also find them ideal for potting into threes for extra heavy stock to bench after Mums.

VARIETY	COLOR	Price per 100
AFTERGLOW: Most popular early bronze.		\$2.00
BERTHA BAUR: Fine orchid lavender.		2.00

**NOT LESS THAN FIFTY OF A VARIETY SOLD**

See the June 10th edition of this "Review" for full list of these seeds

**RUST RESISTANT OUTDOOR BEDDING TYPES  
SUPER MAJESTIC**

Plants 16" to 20" high. We like these for outdoor growing because of their close flower placement, large flower heads and a moderately low growing habit that does not require staking. Suggested for florists in California and southern States.

VARIETY	COLOR	Price per 100
AUTUMN GLOW:	Old rose suffused amber.	\$2.00
DAINTY:	Delicate soft pink.	2.00
HARMONY SHADES:	Terre cotta yellow.	2.00
ORANGE SHADES:	Rose overlaid orange.	2.00
RED SHADES:	Crimson, garnet and ruby shades.	2.00
ROSE SHADES:	Rich Begonia rose. Variable.	2.00
ROSE SENSATION:	Rich rose pink.	2.00
SHELL PINK:	A truly lovely shade.	2.00
SUPERB MIXED:	All the above colors in a grand blend.	2.00

**MAJUS GRANDIFLORUM (28" high)**

This group affords excellent stock for outdoor culture with long stems and fine flower heads. Should be supported in windy localities.

VARIETY	COLOR	Price per 100
AMBER AND GOLD:	NEW. As named.	\$2.00
BUTTERCUP:	Deep clear yellow.	2.00
BRIGHT ROSE:	NEW. A really brilliant true rose.	2.00

**NOT LESS THAN TWENTY FIVE OF A KIND SOLD****BEGONIA SEEDS**

Semperflorens — Fibrous Rooted

PLANTED IN OCTOBER OR AS LATE AS NOVEMBER TWENTY-FIFTH THESE WILL MAKE EXCELLENT POT STOCK BY MOTHERS DAY.

These are an American stock grown to the highest perfection by a famous California specialist. They are ALL varieties of the highest value to the florist and will be found most valuable for pot growing for the holiday trade. In recent years they have also been popular as bedding and border plants.

VARIETY	Price per Packet
TALL TYPES	
This class grows from 12 to 14 inches high. They are free and continuous flowering with the plant practically covered with 2 to 2½ inch florets in huge clusters.	
CHRISTMAS CHEER:	Brilliant cherry crimson, bronze foliage. \$1.00
CHRISTMAS PINK:	Identical to above except a brilliant pink in color. 1.00
MASTERPIECE:	One of the largest flowered clear pinks. Foliage green. 1.00
ZÄHRINGER:	Green foliage. Large flowers of flesh pink edged deep rose. 1.00
CORAL PRIZE:	Foliage bright green edged bronze. Large coral-rose flower. 1.00
ILE de FRANCE:	Light green foliage with very large snow white flowers. 1.00
ESSEN:	Bright bronze foliage. Large scarlet-red flowers. 1.00

**GRACILIS TYPES — DWARF**

These are easily distinguished from the above group. Plants are only 6 to 10 inches high and grow in a perfect globe form. The flowers are smaller but literally cover the plants. Ideal for pots.

APPLEBLOSSOM:	A superb dwarf plant habit of perfect form. Foliage is light green and plants continuously covered with flowers of apple blossom	1.50
LUMINOSA:	Rich deep scarlet. Foliage reddish dark bronze. 10 inches high.	1.00
LUMINOSA COMPACTA:	Identical to above but only 6 to 8 inches high.	1.50
CARMEN:	Compact with greenish bronze foliage. Clear rose pink flowers.	1.00
INDIAN MAID:	Reddish dark bronze foliage and bright scarlet flowers.	1.00

Any three \$1.00 packets for \$2.75; or any six \$1.00 packets for \$5.00

**Terms of Sale**

**PRICES** — All prices are made on a basis of cash with order. No deviation will be made from this rule except where special credit arrangement and usual reference check has been made. **SEEDS** can be sent C. O. D. and will be so forwarded in all instances where the above rule is not met. Strictly cash with order on all shipments outside the U. S. A. **PLANTS AND BULBS ARE NEVER** sent on a C. O. D. basis. **ALL** prices quoted herein are subject to any change in market or business regulation which may become effective after date of publication.

**REMITTANCE** — May be by any of the usual commercial methods of transferring funds. The amount must be in United States money, collectable net, for the full amount of the order. **WE WILL NOT** accept postage stamps as any part of remittance. We use metered postage exclusively and stamps are a total loss.

**TRANSPORTATION** — **SEEDS** will be shipped by insured post, prepaid. Free Air Mail delivery may be had on seeds under conditions mentioned elsewhere in this list. **PLANTS and BULBS** are delivered in so far as our responsibility is concerned when accepted by the transportation agency at Grants Pass, Oregon. Thereafter all goods travel as the property of the purchaser. We recommend that all perishable material travel Railway Express and unless instructed differently this material will all be forwarded by that agency.

**OUR RESPONSIBILITY** — In view of the reasonable prices quoted herein and the varied conditions under which this stock will be grown after leaving our care, it is manifestly impossible for us to guarantee in any manner, descriptive or cultural, the crop resulting from the use of the material listed. Ordering from this list will definitely be construed as your acceptance of these terms as set forth and it is understood that in all cases our liability shall be limited to the actual purchase price paid for any material supplied.
